

Warming the earth...

with HOT air!

THE GLOBAL WARMING FRAUD **ipcc**
INTERGOVERNMENTAL PANEL ON climate change

If you want to discover the fraudulent nature of the global warming theory look up these resources on the web, or go to www.tyrannosaurusradio.com for a direct download of all of these resources.

Resources

FILMS:
The Great Global Warming Swindle

This is the most recent of all the films. It is very thorough and easy to understand. Definitely a must watch for anyone.

CBC - Global Warming Domesday Called Off

Put out by our own CBC, this one hour documentary outlines the science as it truly exists. Green House Conspiracy

This is an Australian documentary from 1990. Incredibly, even 19 years ago Global Warming was a know fraud.

Conspiracy Theory - HAARP about Global Warming, but this video is not specifically written by Lord Monckton, Chief Policy Advisor - Science and Public Policy Institute.

DOCUMENTS:
atmosphere and weather patterns are being manipulated.
FOIA
This folder contains the e-mails hackers attained from a University database. Make your own judgements.
Caught Green Handed
This is an essay written by Lord Monckton, Chief Policy Advisor - Science and Public Policy Institute.

GLOBAL WARMING, GLOBAL COOLING, GLOBAL LIES

IF YOU HAVE NOT HEARD, global warming, climate change and the legacy of Al Gore is all based on the lies perpetrated through the UN and hyped by the media.

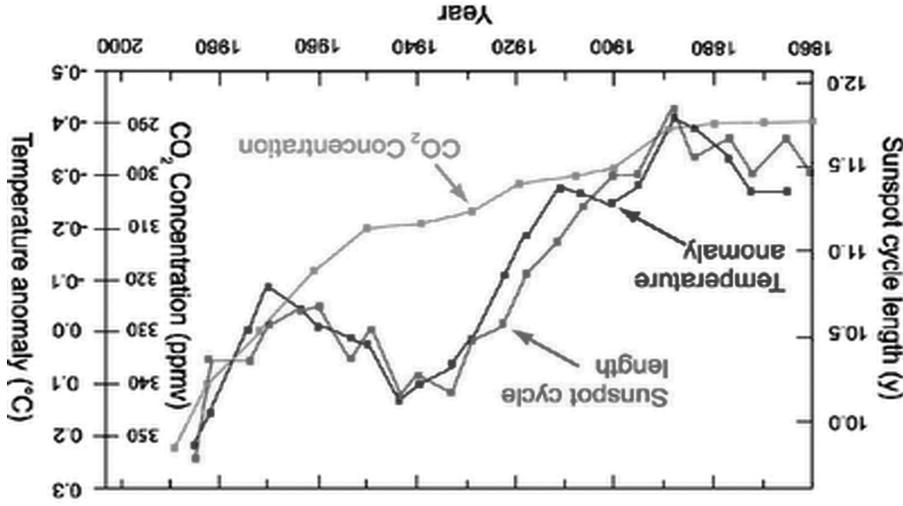

The original concern of a global climate crisis was actually a "global cooling" panic, proliferated by Stanford Universities Prof. Stephen Schneider, who has since hip-hopped, claiming that "global warming" is the new threat. A recent film containing information on Schneider, "Not Evil Just Wrong," has been under legal attack by Stanford.¹

Al Gore later picked up the pieces of Schneider's legacy, by pushing global warming in his film "An Inconvenient Truth." Jones, head of the Climatic Research Unit and Prof. Michael Mann, of Penn State. Mann was investigated by his own peers at Penn State, all of whom believe in global warming, providing no unbiased investigation. They found him not guilty and did not allow an independent group to look into the matter.²

The famous hockey stick graph [right]³ was found to have been completely contrived, using assumptive data and fraudulent methods of data analysis. This fact was fully exposed by the FOIA emails that were stolen from an the mail servers of East Anglia Climate Research Unit. In one email, dated November 1999, one scientist wrote:

"I've just completed Mike's Nature [the science journal] trick of adding in the real temps to each series for the last 20 years (ie, from 1981 onwards) and from 1961 for Keith's to hide the decline."⁴

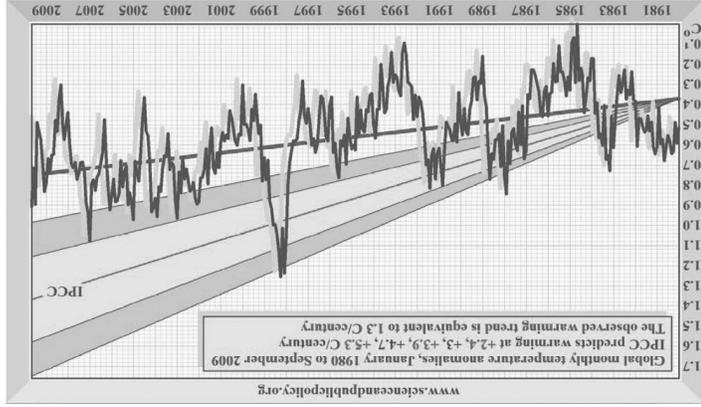

This data was quickly disputed by scientists, meteorologists and professors world-wide. Data [below]⁶ clearly showing not a correlation between CO₂ and temperature, but temperature and sun spots. The increase in solar activity results in an increase in temperature. The heated oceans then release more CO₂, increasing the amounts world-wide. In fact, global temperatures have been on a decline in the past 10 years and ice caps have been increasing in size.⁷ This shatters the Gore-pushed theory of massive sea increases after a 2° temperature change. The Blood-Gore carbon credit company stood to make TRILLIONS of dollars after the Copenhagen meeting, in which global warming was exposed as a fraud.⁸ Conflict of interest?

DRAGGING BEHIND

This data set shows a more intimate relationship forming, not between temperature and CO₂, but temperature and sunspot cycles. It seems that an increase in radiation output from the sun increases the temperature on Earth. Not surprisingly, the sun is the driving factor behind temperature change. CO₂ only follows this temperature increase.

Presented At:
Risk: Regulation and Reality Conference
Dr. Tim Patterson - Professor of Geology at Carleton University
October 7, 2004 in Toronto, ON⁹

TOO FAR TOO FAST

The IPCC's data has been manipulated to predict a sharper increase in temperature than what is actually occurring. Its data model assumes a 1% increase of CO₂ levels per year when its actually closer to .44% per year. Under this model, which also assumes CO₂ is the leading cause of global warming, the increase in temperature is higher than it ought to be.

The most heinous aspect of the global warming fraud was the Copenhagen Bill, that was originally meant to be presented after Barack Obama arrived. It was exposed as one of the most deceitful and deadliest pieces of legislation to ever face the third world. It proposed a twice the carbon emission reductions for countries who produce less CO₂ emissions than the Western World, arousing protests world wide.¹⁰ If the Bill had been pushed through and enforced by the UN, it is estimated that hundreds of millions would die due to the increase in food prices. And today your newspaper, the Toronto Star, Sun, Metro, etc. all push the idea that global warming is real. They provide no evidence, no science, just the embalming ramblings of Al Gore, the man-bear-pig. Don't listen, do your own research!¹¹ Check the back for the sources and resources that will help you find the truth.

University of Alabama Huntsville global temperature record, 1980-2009⁴
